PUKHRAJ ADDITIVES LLP

ENERGY CONSERVATION POLICY

Document No: PAL/POL/21 Issue date: 01.07.2023 Rev. No & date: 02/01.04.2026

Pukhraj Additives LLP is committed to promoting the efficient and responsible use of energy to support sustainable business operations, reduce environmental impact, and improve operational efficiency. The Company encourages all employees to use electricity, fuel, water, compressed air, and other energy resources responsibly by avoiding unnecessary consumption and adopting energy-efficient work practices.

Employees are expected to switch off lights, fans, air conditioners, computers, machinery, and other electrical equipment when not in use, report energy leakages or equipment malfunctions promptly, and operate machines and utilities in accordance with established procedures to minimize energy wastage. The Company shall promote energy conservation through preventive maintenance, the use of energy-efficient equipment, employee awareness programmes, continuous improvement initiatives, and compliance with applicable legal, regulatory, and customer requirements. Management shall periodically review energy performance and encourage employees to contribute ideas and suggestions for improving energy efficiency and supporting the Company's sustainability objectives.
